## **BIOGNOST®**

## Hematoxylin reagents

Nuclear stains for standard HE staining

Each of BioGnost's
Hematoxylins is specially
stabilized in order to maintain
the reagent's reactivity for
prolonged periods of time, as
well as to maintain the quality
of the reagent. Every staining
provides a crystal clear and
highly detailed image of
the cell's nucleus, which in
turn makes abnormal or
pathological changes easier
to detect.
