SECTION 4. First aid measures	
4.1.	Description of first aid measures
	General notes:
	-
	Following inhalation:
	Carry the afflicted person out for fresh air, place them in half lying position and calm them down. If breathing stops, immediately apply artificial mouth-to-nose respiration. If that is not possible, apply artificial mouth-to-mouth respiration. Rush the afflicted person with persistent symptoms to the hospital while keeping them in lateral recumbent position in order to keep the airways clear.
	Following skin contact:
	Remove contaminated clothing. Immediately wash with plenty of water and soap. Seek medical assistance if the symptoms of irritation remain.
	Following eye contact:
	Rinse out with plenty of water with the eyelid held wide open for at least 10 minutes. If the symptoms remain, immediately call in ophthalmologist.
	Following ingestion:
	Provide water to the afflicted person and let them spit out. Position them in the half lying pose in a quiet place. Let them slowly drink a glass of water, taking in small gulps. DO NOT induce vomiting. Call for medical assistance to arrive at the scene of the accident. If spontaneous vomiting occurs, keep the person's head low while lying down in order to avoid aspiration.
	Self-protection of the first aider
	Avoid direct contact with the chemical; use appropriate protective equipment described in Section 8.
