#### Specific concentration limits

##### Formaldehyde, 37%

inhalation: ATE = 100 ppmV (gases)

oral: ATE = 500 mg/kg bw

STOT SE 3; H335: C ≥ 5 % (eye)

Skin Corr. 1B; H314: C ≥ 25 %

Skin Irrit. 2; H315: 5 % ≤ C < 25 %

Eye Irrit. 2; H319: 5 % ≤ C < 25 %

##### Methanol

STOT SE 1; H370: C ≥ 10%

STOT SE 2; H371: 3 % ≤ C < 10 %

#### Notes:

**B** - Some substances (acids, bases, etc.) are placed on the market in aqueous solutions at various concentrations and, therefore, these solutions require different classification and labelling since the hazards vary at different concentrations. In Part 3 entries with Note B have a general designation of the following type: 'nitric acid ... %'. In this case the supplier must state the percentage concentration of the solution on the label. Unless otherwise stated, it is assumed that the percentage concentration is calculated on a weight/weight basis.

**D** - Certain substances which are susceptible to spontaneous polymerisation or decomposition are generally placed on the market in a stabilised form. It is in this form that they are listed in Part 3. However, such substances are sometimes placed on the market in a non-stabilised form. In this case, the supplier must state on the label the name of the substance followed by the words 'non-stabilised'.

**F** - This substance may contain a stabiliser. If the stabiliser changes the hazardous properties of the substance, as indicated by the classification in Part 3, classification and labelling should be provided in accordance with the rules for classification and labelling of hazardous mixtures.

#### SECTION 4. First aid measures

|      |                                   |                                                                                                                                                                                                                                                                       |
|------|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4.1. | Description of first aid measures |                                                                                                                                                                                                                                                                       |
|      | General notes:                    | Immediately remove all the contaminated and wet clothes and footwear. The first responder should also take care of self-protection. Toxicity symptoms may occur several hours after the exposure, that is why medical supervision is necessary for at least 48 hours. |

|               |                                              |                |               |          |   |
|---------------|----------------------------------------------|----------------|---------------|----------|---|
| Trading name: | <b>FORMALDEHYDE 37% FOR USE IN HISTOLOGY</b> |                |               |          |   |
| Product code: | F37H-X**                                     | Revision date: | 17 April 2026 | Version: | 6 |

|                                     |                                                                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Following inhalation:               | Carry the afflicted person out of the contaminated area into a well-ventilated area or out for fresh air. Gas mask may be removed only after removing contaminated clothes. In case of respiratory arrest, provide artificial respiration (while not exposing the provider). In case of unconsciousness, transport the afflicted person in the lateral position. Seeking medical advice is advised. |
| Following skin contact:             | Take off immediately all contaminated clothing and footwear. Skin that came into contact with the material must be thoroughly washed using water and soap for skin cleaning for at least 20 minutes.                                                                                                                                                                                                |
| Following eye contact:              | Rinse out with plenty of water with the eyelid held wide open for at least 20 minutes. If the symptoms remain, immediately call in ophthalmologist.                                                                                                                                                                                                                                                 |
| Following ingestion:                | Do not induce vomiting. Rinse the oral cavity, drink at most 1-2 glasses of water. Immediately consult a physician and show the container or label. In case of swallowing large quantities, transport the afflicted person to the hospital.                                                                                                                                                         |
| Self-protection of the first aider: | -                                                                                                                                                                                                                                                                                                                                                                                                   |

#### 4.2. Most important symptoms and effects, both acute and delayed

|                         |                                                                                                                                                                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Following inhalation:   | Irritation of the mucous membrane of the nose/throat may occur (burning sensation, urge to sneeze, runny nose). High concentration may cause difficult breathing, coughing fits, chest tightness, headache, vertigo and drowsiness. |
| Following skin contact: | Irritation, redness with stinging and pain, skin cracking, rash, swelling, burns, blisters and delayed onset of inflammatory processes may occur.                                                                                   |
| Following eye contact:  | Depending on concentration and exposure time, mucosa stinging, lacrimation, redness and pain may occur, as well as bleeding, delayed onset of inflammatory processes and permanent eyesight damage.                                 |
| Following ingestion:    | Depending on concentration and exposure time, it may lead to stinging and digestive mucus damage, abdominal pain, nausea, vomiting (possibly of bloody content).                                                                    |

#### 4.3. Indication of any immediate medical attention and special treatment needed

|   |  |

### SECTION 5. Firefighting measures

|      |                                                       |                                                                                  |
|------|-------------------------------------------------------|----------------------------------------------------------------------------------|
| 5.1. | Extinguishing media                                   |                                                                                  |
|      | Suitable extinguishing media:                         | water, foam, dry powder, CO <sub>2</sub> , water spray or alcohol resistant foam |
|      | Unsuitable extinguishing media:                       | Strong jet of water                                                              |
| 5.2. | Special hazards arising from the substance or mixture |                                                                                  |

|               |                                              |                |               |          |   |
|---------------|----------------------------------------------|----------------|---------------|----------|---|
| Trading name: | <b>FORMALDEHYDE 37% FOR USE IN HISTOLOGY</b> |                |               |          |   |
| Product code: | F37H-X**                                     | Revision date: | 17 April 2026 | Version: | 6 |

|      |                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                            |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | Hazardous combustion products:                                                                                                                                                       | Formalin solution is not flammable by itself. Gases released from the solution are highly flammable if the solution concentration exceeds 25%. Carbon dioxide and carbon monoxide may form in case of burning, the resulting fumes are heavier than air and may spread along the floor. Explosive mixtures of formaldehyde vapors and air may form during heating and also present danger. |
| 5.3. | Advice for firefighters                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                            |
|      | Use a self-contained open-circuit compressed air breathing apparatus and fireproof clothing. Cool closed containers exposed to fire with water spray, in order to prevent explosion. |                                                                                                                                                                                                                                                                                                                                                                                            |
| 5.4. | Additional information                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                            |
|      | Remove the container from the hazard zone and cool with water. Make sure the water used for extinguishing fire does not contaminate water surface or groundwaters.                   |                                                                                                                                                                                                                                                                                                                                                                                            |

| SECTION 6. Accidental release measures |                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

## 8.2. Exposure controls

### 8.2.1. Appropriate engineering controls

|                                                                                |                                                                                                                           |
|--------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| Substance/mixture related measures to prevent exposure during identified uses: | Use the product in well ventilated rooms. Use personal protective equipment. Do not eat, drink or smoke in the workspace. |
| Structural measures to prevent exposure:                                       | No information available.                                                                                                 |
| Organisational measures to prevent exposure:                                   | Organization of work in order to reduce other worker's influence during work process.                                     |
| Technical measures to prevent exposure:                                        | Secure proper workspace ventilation in order to keep concentration levels in air below permitted levels.                  |

### 8.2.2. Personal protection equipment

|                                   |                                                                                                                                      |
|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| 8.2.2.1. Eye and face protection: | Safety glasses that stick to face; protective gas mask that covers the entire face in case of higher levels of concentration in air. |
|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|

### 8.2.2.2. Skin protection

|                  |                                                                                                                                                                                                                                                                                                                                                                    |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Hand protection: | <p>Protective gloves must be according to the EU Directive EU 2016/425/EEC and the EN 374 standard.</p> <p>Full contact:</p> <p>Glove material: nitrile rubber<br/> Glove thickness: 0.4 mm<br/> Time until perforation: 480 min</p> <p>Splash contact:</p> <p>Glove material: nitrile rubber<br/> Glove thickness: 0.2 mm<br/> Time until perforation: 60 min</p> |

|---------------|----------------------------------------------|----------------|---------------|------------|
| Trading name: | <b>FORMALDEHYDE 37% FOR USE IN HISTOLOGY</b> |                |               |            |
| Product code: | F37H-X**                                     | Revision date: | 17 April 2026 | Version: 6 |

|          |                                                         |                                                                                                                                                            |
|----------|---------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
|          | Other body parts protection:                            | Wear protective suit with long sleeves that protects from chemicals and shoes that cover the entire foot.                                                  |
| 8.2.2.3. | Respiratory protection:                                 | Use mask that covers the entire face. Recommended filter type: ABEK. Use respirators and components tested according to and approved by the standard (EU). |
| 8.2.2.4. | Thermal hazards:                                        | No information available                                                                                                                                   |
| 8.2.3.   | Environmental exposure controls                         |                                                                                                                                                            |
|          | Substance/mixture related measures to prevent exposure: | See Section 6                                                                                                                                              |
|          | Structural measures to prevent exposure:                | Use modern equipment.                                                                                                                                      |
|          | Organisational measures to prevent exposure:            | Adapt the work process to the required working conditions of the workplace.                                                                                |
|          | Technical measures to prevent exposure:                 | See Section 6                                                                                                                                              |

| SECTION 9. Physical and chemical properties |                                                                       |                                                                 |                          |

Stability and reactivity |                                     |                                                                                                                                                                                                                                                                                                                                                                                          |
|--------------------------------------|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10.1.                                | Reactivity:                         | No information available.                                                                                                                                                                                                                                                                                                                                                                |
| 10.2.                                | Chemical stability:                 | The product is chemically stable under standard ambient conditions of storing and using. Keep away from sources of heat and ignition.                                                                                                                                                                                                                                                    |
| 10.3.                                | Possibility of hazardous reactions: | Explosion hazard when in contact with: nitric acid, hydrogen peroxide, nitromethane, acids, phenol, nitrogen dioxide<br>Exothermic reactions occur with the following substances: bases, nitrides, polymerization initiators, sodium hydroxide, potassium permanganate, furfuryl alcohol, highly oxidizing agents, perchloric acid with aniline, hydrochloric acid, magnesium carbonate. |
| 10.4.                                | Conditions to avoid:                | Sources of heat, sparks, ignition, and low temperature.                                                                                                                                                                                                                                                                                                                                  |
| 10.5.                                | Incompatible materials:             | Highly oxidizing agents, acids, bases and different metals, steel manufactured by melting, copper.                                                                                                                                                                                                                                                                                       |
| 10.6.                                | Hazardous decomposition products:   | See Section 5.                                                                                                                                                                                                                                                                                                                                                                           |
